

Project Strategy & Planning Meeting

Date: June 18, 2026

Duration: 2 Hours

Attendees: Tarun (Project Lead), Development Team, Design Team, Testing Team.

Discussion Notes: Portfolio improvement, AI challenge progress, cloud projects, internship preparation, technical issues, risks, blockers, action items, and future goals were discussed.

Portfolio Development: Improve responsiveness, project descriptions, certificates section, README files, and loading speed.

AI Challenge Progress: Day 16 and Day 17 completed, Day 18 in progress, documentation and LinkedIn consistency need improvement.

Cloud Learning: AWS Lambda, API Gateway, DynamoDB, EventBridge, serverless projects, and AWS Cloud Practitioner preparation.

Internship Preparation: ATS resume optimization, weekly applications, interview practice, LinkedIn visibility, and GitHub portfolio enhancement.

Challenges: Time management, documentation delays, balancing academics and self-learning.

Technical Issues: AWS EC2 deployment errors, environment variables, API keys, database design, and authentication testing.

Risk Analysis: Challenge delays, incomplete documentation, internship deadlines, limited cloud resources, and burnout risk.

Decisions Made: Focus on one project at a time, maintain GitHub updates, publish LinkedIn posts, and use AI tools productively.

Action Items: Complete Day 18 documentation, update repositories, improve portfolio responsiveness, review AWS architecture, and test outputs.

Meeting Conclusion: Prioritize challenge completion, portfolio improvement, deployment, and internship preparation.
